

## THE DRONE ZONE

*The Evolution Revolution of Asset Management in the 21st Century*

Ozwater is the largest water sector exhibition and conference in the Southern Hemisphere involving all the key players in the water industry. Operators, engineers, utilities, local government and all levels of infrastructure supply and management form our demographic of over 4,000 delegates, exhibitors and trade visitors across the two and a half days.

### **Why is Ozwater the perfect vehicle for your drone technology?**

Drone technology has reduced costs and increased access for more sustainable management of infrastructure in the fields of asset protection, maintenance and monitoring. There is now increasing demand for services including:

- ◆ **Aerial mapping**
- ◆ **Thermal imaging**
- ◆ **Infrastructure inspection**  
Pipe, Fleet, Plant, Built environment
- ◆ **3D terrain site surveys**  
Topography, Water run-off
- ◆ **Fast and accurate delivery of data**

At Ozwater'18, we're creating a platform for exhibitors to not only promote their technologies, but also demonstrate them in a safe and accessible environment. The Drone Zone is a hands-on exhibition space that has been designed specifically to demonstrate the capabilities of your technology and share collateral with delegates and trade visitors.

The Zone itself will consist of both pod stands and shell scheme options.

***Drone Pod Stand - AUD\$3300 (including GST)***

***Drone Shell Scheme Booth - AUD\$5823 (including GST)***

Each Drone Zone Pod is 2.25 sqm of space with a lockable cupboard and counter, suitable for displaying your technology. The premium sites are a larger shell scheme space of a sqm with fascia, facing directly on to the Drone Demonstration Zone.

### **The Drone Demonstration Zone**

The Drone Demonstration Zone is a netted space complete with audio and visual technology to enhance your presentation. Each Drone Zone exhibitor will benefit from up to two (2) peak time 10-minute presentation spots in the demonstration zone. Peak times are morning/afternoon tea and lunch periods, however, should you wish to target invited clients, the zone will be available to book at all times the exhibition is open.

For more details on the Drone Zone and exhibiting at Ozwater'18, please contact **Steve Comey**, Senior Exhibition Manager.
