About the Australian Water Association

The Australian Water Association (AWA) is Australia's largest water network inspiring and driving a sustainable water future. We provide individuals with career enrichment and organisations with business opportunities as we **share** information and knowledge, **connect** members with industry and stakeholders, and **inspire** positive change.

Our members cover every aspect of the water sector including professionals and practitioners working in utilities, engineering, urban design and planning, science, research, academia, energy, resources, manufacturing, mining and agriculture.

We provide a platform for members to share their expertise within the water sector, across other sectors of the economy and within the community. Our programs and activities facilitate sustainable water management by supporting the following:

- Implementation of the Sustainable Development Goals
- Development of young professionals and future water leaders
- Sharing solutions to our environmental, social, and economic water challenges

Ozwater'26 – 26 May – 28 May 2026 Brisbane Convention Centre

Organised by the industry, for the industry, Ozwater is an event unlike any other. Run annually by the Australian Water Association (AWA), Ozwater is a three-day, multi-stream conference and trade exhibition featuring a strong line-up of international and national keynote speakers, scientific and technical papers, case studies, workshops, panel sessions and poster presentations. It is complemented by social functions and networking opportunities. This event attracts international Heads of Water and Government representatives, and key decisions makers from across Australia and around the globe.

At Ozwater'26, we recognise that water is not just a resource – it's a shared responsibility and our collective future. The theme **"Our Water. Our Tomorrow."** calls on individuals, communities, and industries to come together to protect, value, and invest in water for generations to come.

Our water shapes every part of our future - from the health of our communities to the resilience of our environment and the strength of our economy. Through inspiring keynotes, bold ideas, and collaborative discussions, we'll tackle the challenges and opportunities facing the water sector head-on - from climate resilience and innovation to equity, sustainability, and the partnerships needed to drive change.

Drawing on both traditional wisdom and innovative thinking, Ozwater'26 will spotlight the knowledge, experience, and passion of our diverse water communities. Together, we will explore how valuing water across systems, cultures, and landscapes can lead to resilient services, sustainable growth, and healthier communities.

In a time of global uncertainty and competing priorities, water must take centre stage. It is a powerful driver of economic development, social equity, and environmental resilience. By giving water the space to lead, we can shape a stronger tomorrow.

Join us at Ozwater'26 to help define the future of water. Be part of the conversation. Be part of the solution. Be part of tomorrow.
